TRAMO ETV

Quality transformers made in Sweden

QUALITY

INNOVATION

CUSTOMIZATION

SPEED

TRAMO ETV is continuously developing new designs and more efficient transformers and chokes. We are always engaging in a close dialogue with our customers R&D teams to understand their objectives and obstacles. Our innovations are driven by our customers requirements.

Our technical engineering team can make efficient solutions, simply by taking an active part in our customers development efforts. Using the latest and most advanced equipment together with our unique experience and knowhow, we can create customized solutions supporting our customers and simplifying their challenges.

TRAMO ETV:s production processes supports small to large series without sacrificing neither short delivery times nor quality. **Our customers have no need to store unnecessary spare parts**, Tramo ETV:s “Trafo Emergency” guarantees that the product will be ready for shipment within 48 hours.

WHY TRAMO ETV?

EXPERIENCE

- Most of our employees have been in the transformer manufacturing business for a very long time giving them and TRAMO ETV a vast amount of knowledge, both in developing and manufacturing transformers, chokes and other electrical components. With our + 50 000 transformer designs since 1925, we have seen it all.

ENVIRONMENTAL THINKING

- Our environment is one of our corner-stones when we are planning and producing our transformers and chokes. We are continuously following up on the availability of new solutions and materials that make our products even more environmentally friendly. As our main market is northern Europe, we try to use local suppliers to minimize unnecessary transportation impacting the environment in a negative way.

DEVELOPMENT SUPPORT

- Our technical engineering team is available to support our customers R&D teams during the development stage of new products. By being a part of the development already from the beginning, we can utilize our experience and knowhow supporting our customers with the most efficient solutions.

FOCUS: SUSTAINABILITY

CONFLICT MINERALS

- All of our products are made in accordance with the Dodd-Frank Consumer Protection Act and do not contain any conflict minerals.

WORKING CONDITIONS

- We are not accepting materials from suppliers that are making use of child or forced labor. This also applies towards suppliers that are discriminating or not following other legal directives and environmental requirements.

THE GLOBAL GOALS For Sustainable Development

QUALITY ASSURANCE

- All of our raw materials are well documented considering the manufacturing of these materials. We are mainly using European suppliers with the highest quality standards and all products are made with UL approved material.

WORLDWIDE PRESCENCE

TRAMO ETV is known for the flexibility in all product designs offering configurations for different voltage systems and standards.

This is one of the reasons that multinational large companies are using transformers and chokes made by TRAMO ETV.

Our transformers, chokes and other products are found in different types of equipment in most countries in all continents.

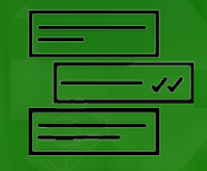

OVERVIEW of customer values

High factory capacity

Ensures short delivery times

Large stock

Ready for immediate delivery

R & D Support

By our outstanding technical engineering team

Swedish quality

Gives you peace of mind

Worldwide

Our products are used all over the world

Emergency supply

With most deliveries within 48 hours

Experience

Outstanding customer value

Environmental policy

One of our corner stones

ISO & Triple AAA Certified, DNV, cUL, RINA, BV, CE, CCC

Ensures compliance

Products and Solutions

Transformers and Chokes from small to large, low too high voltage. TRY US!
